Education

BTech Computer Science Engineering

MIT World Peace University (Pune, MH)

2025

CGPA 8.5

CBSE-X Science Stream

Army Public School (Pune, MH)

2020

78%

CBSE-X Science Stream

Army Public School (Pune, MH)

2018

81%

Key Achievements

- A runner-up in the HackMIT competition and a participant in the Hackathon, exhibiting flexibility in addressing practical issues.
- Demonstrated leadership skills by spearheading event organization initiatives in HackMIT and RIDE.

Technical Skills

- **Languages:** C++, Python, JavaScript, TypeScript.
- **Web Technologies:** HTML5, CSS3, Node.js, React.js, Expressjs, React Native, TailwindCSS, Django.
- **Database:** MySQL, MongoDB, Postman, PostgreSQL, ChromaDB
- **Data Science (AI/ML):** NLTK, NLP, GPT-3, OpenAI, Gemini Pro, Multimodal.

Experience

Elinfochips (An Arrow Company)

Associate Engineer (C++, MFC, WASAPI)

Pune, MH (On Site)

January 2025 – Present

- Developed a real-time desktop audio recorder with input level visualization, supporting both default and raw capture modes via WASAPI.
- Integrated device change detection and implemented loopback recording using IAudioClient3 and Core Audio APIs.

Vidyardhimitra.org

Full Stack Developer Intern

Pune, MH (On Site)

June 2024 – December 2024

- Developed a full stack website using the MERN stack, enabling student registration, college prediction, and exam enrollment functionalities.
- Collaborated closely with cross-functional teams to ensure seamless integration, testing, and deployment of solutions.

Projects

Portfolio Website (React, TypeScript, Framer Motion, Tailwind CSS) | [GitHub](#) | [Live](#)

- Built and deployed a responsive portfolio website with dark mode, Framer Motion animations, and a contact form using React, TypeScript, and Tailwind CSS, optimized for performance, SEO, accessibility, and cross-browser compatibility via Netlify CI/CD.

Weather Dashboard (React, TypeScript, Framer Motion, OpenWeather API, Tailwind CSS) | [GitHub](#) | [Live](#)

- Developed a responsive weather application with real-time forecasts, city search, dynamic day/night video backgrounds, and smooth animations using React, TypeScript, Tailwind CSS, Framer Motion, and OpenWeather API, optimized for performance and seamless multi-device experience.

RidEasy (Bike Booking) (Vite+React, JavaScript, HTML, CSS) | [GitHub](#)

- Developed a user-centric online test bike ride booking application using React, Tailwind CSS, Node.js with Express, and MongoDB, leveraging React Fiber for efficient rendering and agile methodologies for iterative development.

Loan Onboarding System (Django, PostgreSQL, Google Cloud Storage, REST API) | Internship Project

- Built a loan onboarding system with Django and Django REST Framework, implementing multi-tenant architecture with dynamic database routing, integrating Google Cloud Storage and JWT authentication for secure file management and user sessions.
