

OMKAR MAHABDI

DATA ANALYST

📍 Pune, Maharashtra | 📞 +91 7028143066 | ✉️ omkarmahabdi008@gmail.com

PROFESSIONAL SUMMARY

Data Analyst with hands-on experience in data collection, data cleaning, preprocessing, exploratory data analysis, SQL-based analysis, business reporting, dashboard development, and data-quality improvement. Proficient in Python, Pandas, Advanced SQL, DuckDB, Microsoft Excel, Tableau, Power BI, and Streamlit, with practical experience converting raw and unstructured data into structured, analysis-ready datasets and actionable business insights.

Experienced in developing automated reporting workflows, interactive dashboards, analytical queries, and data-retrieval solutions for business and operational analysis. Improved data accuracy to 92%+ through systematic data-quality analysis and reduced report retrieval time from 45 seconds to under 500 milliseconds through SQL workflow optimization. Strong ability to translate business requirements into analytical solutions, validate outputs, and deliver accurate insights under tight deadlines.

CORE DATA ANALYTICS SKILLS

- Exploratory Data Analysis (EDA)
- Data Cleaning & Preprocessing
- Data Validation & Quality Analysis
- Data Transformation & Structuring
- Trend & Comparative Analysis
- Statistical Analysis
- Python, Pandas
- DuckDB, Streamlit
- Advanced SQL, CTEs
- Window Functions & Percentiles
- Aggregations & Ranking
- Analytical Queries
- Query Optimization
- Data Retrieval
- Tableau, Power BI
- Interactive Dashboards
- Data Visualization
- Automated Reporting
- KPI Analysis
- Pricing & Discount Analysis
- Customer Analytics
- Inventory & Supply Chain Analytics
- Shipping & Order Fulfillment Analysis
- Supplier & Delivery Performance

PROFESSIONAL EXPERIENCE

DATA ANALYST – PYTHON, SQL

eInfochips (An Arrow Company)

January 2025 – Present

Hybrid, Pune, Maharashtra

- Analyze, clean, preprocess, and structure data from multiple sources to create reliable datasets for reporting, business analysis, and decision-making.
- Redesigned SQL-driven data ingestion and retrieval workflows, reducing data retrieval and report turnaround time from 45 seconds to under 500 milliseconds.
- Investigated SQL-based failure patterns, identified data-quality gaps, cleaned inconsistent source information, and standardized unstructured data, contributing to 92%+ data accuracy.
- Developed automated reporting workflows that converted analytical outputs into structured, business-readable reports while reducing manual reporting effort.
- Gathered and processed information from multiple unstructured PDF sources, converting raw content into consistent fields and reusable analytical datasets.
- Supported data-model creation and downstream analysis by preparing structured, query-ready data for analytical workflows.
- Collaborated with product and support teams to understand business requirements, translate stakeholder needs into reporting features, and communicate project progress.
- Took end-to-end ownership of a semantic data-retrieval initiative, independently driving technical decisions and coordinating with internal stakeholders.
- Managed concurrent data and reporting requirements while validating analytical outputs for consistency and accuracy before stakeholder delivery.
- Performed end-to-end exploratory data analysis on restaurant datasets using Python, Pandas, SQL, and DuckDB to identify trends in ratings, cuisines, pricing, and customer preferences.
- Applied advanced SQL techniques including CTEs, window functions, aggregations, and analytical queries to extract actionable business insights.
- Developed interactive Tableau and Streamlit dashboards with filters for location, cuisine, ratings, and cost to facilitate dynamic data exploration and decision-making.
- Optimized analytical queries using DuckDB to improve data-processing and analysis workflows.
- Evaluated relationships between restaurant pricing and customer ratings and identified a weak correlation between the two variables.
- Maintained data consistency and accuracy by validating analytical results and reporting outputs before delivery to stakeholders.

DATA ANALYTICS PROJECTS

FLIPKART PRICE ANALYSIS

Technologies: SQL, Python, DuckDB, Pandas, Tableau, Streamlit

- Conducted comprehensive analysis of product pricing, discounts, and customer ratings using Python, Pandas, SQL, and DuckDB.

- Applied advanced SQL techniques including window functions, percentiles, ranking functions, aggregations, and comparative analysis.
- Analyzed pricing distributions, discount effectiveness, product segments, and customer ratings to identify meaningful business trends.
- Developed interactive dashboards to evaluate pricing strategies across product categories and identify opportunities for competitive pricing optimization.
- Converted analytical findings into actionable business insights for evaluating pricing strategy and overall business performance.

SUPPLY CHAIN AND INVENTORY ANALYTICS

Technologies: Python, SQL, Pandas, DuckDB, Tableau, Streamlit

- Performed end-to-end supply chain and inventory analysis to evaluate inventory performance, shipping efficiency, and order-fulfillment effectiveness.
- Analyzed operational datasets covering inventory levels, supplier performance, delivery performance, shipping modes, and order fulfillment.
- Created interactive Tableau and Streamlit dashboards to monitor operational metrics and support data-driven decision-making.
- Used advanced SQL aggregations, CTEs, and window functions to identify operational trends, bottlenecks, and performance gaps.
- Analyzed delivery performance across shipping modes and identified First Class shipping as the least reliable delivery mode based on the analyzed dataset.
- Translated operational analytics into insights supporting inventory, logistics, shipping, and fulfillment performance evaluation.

CERTIFICATIONS & TRAINING

- Python Essentials 2 – Cisco
- Data Analysis with Python – freeCodeCamp
- Data Analytics Essentials – Cisco
- Deloitte Australia – Data Analytics Job Simulation
- Programming with Python 3.X – Skillup

ACHIEVEMENTS

- Ranked 872 among 445,000+ participants in the TCS CodeVita Global Coding Challenge, with participation spanning 94 countries.
- Awarded a Merit Scholarship of INR 77,500 for exceptional academic performance.
- Finalist – HackMIT
- Participant – Mercor Hackathon

EDUCATION

Bachelor of Technology (BTech) – Computer Science Engineering <i>MIT World Peace University</i>	August 2022 – October 2025 <i>Pune, Maharashtra</i>
CBSE Class XII – Science Stream <i>Army Public School</i>	August 2019 – August 2020 <i>Pune, Maharashtra</i>
